

BE SAFE WHE GRILLING WITH PROPANE!!

The Propane Education and Research Council urges grillers to not only read safety advice, but follow it. Getting into the habit of using safety procedures is a good start. This way, every barbecue or cookout this summer can be fun and safe.

When the cylinder is refilled, have the supplier check for dents, damage, rust or leaks.

After filling or exchanging, take the cylinder home immediately. Keep the vehicle ventilated and the cylinder valve closed and capped.

Always use or store cylinders outdoors in an upright position. Do not use, store or transport cylinders near high temperatures (don't store spare cylinders near the grill).

Never leave the grill unattended. Always follow grill manufacturer's instructions on lighting the grill and make sure the grill top is open.

Before connecting or lighting a propane gas grill, use a leak-detection solution to check connections for tightness. Do not use matches or lighters to check for leaks.

If you suspect a gas leak, and are able to safely turn off the gas supple valve, do so immediately and call the fire department.

Do not allow children to tamper or play with the cylinder or grill.

Do not smoke while handling a propane cylinder.

Never pour an accelerant such as lighter fluid or gasoline on the grill.

When not in use, grill burner controls should be turned off and cylinder valve closed.
